Tim Bemer

What? Are you sure you're Ok? You're not hurt anywhere?

Ellie Benner

I have a little bit of a headache but think we are okay. Just very shaken up

Tim Bemer

Betsy Bemer

So scary

Betsy Bemer

Glad all is ok. I would recommend you get checked at a hospital talking from previous experience. Whiplash is very deceiving.

Mary Hoetzel

And you should document this in a hospital in case you need to file a claim at a later date. It can be fine now but tomorrow or several days later you're in pain.

Betsy Bemer

Agree ^^ I'm sure ya'll are both totally fine and don't want to scare you but this happened to our friend and she didn't realize anything was wrong with her back until months later.

Mary Hoetzel

Same happened to me. Just trying to be helpful
