Very first video she sent me. March 26

Those are highly filtered videos. Who takes a video of themselves and applies a filter like that. I've seen fake AI videos just like it. It alters their face.

Sorry man. I would mess with her and try and get something back

Yea she definitely always looks different.

➔ Replying to you, 2023-05-23 16:25:53: « Sorry man. I would mess with her and try and get something back »

Not how it works lol

➔ Replying to you, 2023-05-23 16:25:53: « Sorry man. I would mess with her and try and get something back »

She played on my nice side and bad marriage

Yea man. Id also go all out to get eyes on this, file the report

Its awful what these people do to gain trust

Do I send in pics?

You still don't understand the difference between an exchange and a secondary exchange

That's from her afteri told her o know I used fabricated site

Do you know of this?

Find out for yourself what is a professional exchange and what is an ordinary exchange

This too?

Yea there is a difference between types of exchanges but what she's saying as the reason to not question it is absurd to someone who knows. She's saying Lbank exchange is a decentralized exchange vs a Coinbase which is centralized which means nothing here

She keeps saying if i pay the tax funds get released to my crypto.com
Did you look at email with the "adress " to pay tax at??

I don't see an email

Stephen.Boerner@gmail.com

You sending from elementalresorations@gmail.com ??

I have a typo in there just confirming it's from that address. Yea I don't see anything from you

I can tell you. Very confident. That's not how it works on any exchange anywhere

Yea just re sent

Ask if that amount comes out of your total and is kept by Lbank or do you have to front that tax payment then you get the full amount from Lbank ?

I have to front

Then funds get released

Find out for yourself what is a professional exchange and what is an ordinary exchange or

From her

I'm aware of what she is trying to say, but that's not the terminology

Now she claims she will help pay the taxes lol

And playing the broken heart card

Assuming the EX on the end of L Bank EX. is what she means for exchange?

Yea that are adding the EX to the branding to make it close to the real version

Ok

I confirmed this scam group is from china

But how does she benefit?

She is Lbank.

When you wired Lbank \$50k, or whatever the amount it was, it didn't go to Lbank, it went to her. "Her" is a criminal organization from china. They created an Lbank lookalike site. You can see the "EX" in the branding and domain used. They built a fake trading platform that looks like Lbank and they get people to create accounts and do the same. They code it so it feels like you're conducting a transaction. And they have the type of security checks you'd expect like sending photo ID and passport which allows them to mimic actual financial institutions while also allowing them to gather even more information on their victims.

They are using artificial intelligence to create fake videos and photos. Even if you hear a live voice, it's fake.

They gave you fake evidence in the form of a supposed Russian female with her pics and videos, but the mistake I caught shows they are Chinese and from china.

The blue images in the emails show as attachments in gmail when you're on a laptop, not viewable on a phone. The blue images show as attachments and display the images file name. The files names of the images within her email are in Chinese

Crazy wow

What precautions should I take with my identity? Any recommendations?

I would put a freeze on your credit through each of the three credit bureaus

So I can't use them?

Transition, Experian, and Equifax

➔ Replying to you, 2023-05-23 18:58:42: « Transition, Experian, and Equifax »

Ok on it

This requires them to call you if your social security number is used to apply for credit anywhere at the time it is requested

If that's you, you'll answer and say yes I'm applying for credit

If not, you'll be stopping a scammer from taking a line of credit out on your name

Thank I

I

U

You have to create accounts with each of those three credit bureaus . Within your dashboard once's logged in, you can navigate and find the option to put a freeze on your credit

Also see email I just sent with an article on how to do it. Not too crazy a process but lemme know if you have issues

So use all 3? Or pick one?

All three

It's free

Cool

Don't buy anything they sell you when you log in. They sell added credit protection shit but don't buy it from them

Ok

They are the overseers of personal credit . Three bureaus oversee it. You have a credit score logged with all three of them. If you applied for a mortgage, the mortgage lender checked with each of these three bureaus to get your credit score to appraise the risk of lending

So you have to tell all three you want to freeze your credit

Oh ok

So no lender like the bank behind Best Buy credit card for example can approve that credit card line without the bureaus providing them a credit score and credit transaction history

And now you know people have all the info they need to apply for credit lines in your name
