Excellent excellent talk at sx

Excellent

4/14/24, 1:14 PM

I'd really like to do sxsw properly with you. I tried to coordinate it last time, but it was too much of a mess

There isn't another person that I would like to go to talks with, sit and work, meet and greet, etc

Javi now offers ozempic which I find hilarious

Wait for diabetes ?

Laughed at "Wait for diabetes ?"

Why wait?!

I can get chatgpt to diagnose me

I just had it write a children's book for Melissa's nephew she's visiting

Put the one nephews face on the front kid

Every AI I tried insisted on using black kids when I used "Philadelphia " in the prompt

So funny. Even when I said not to

Laughed at "Every AI I tried insisted on using black kids when..."

This is right up your alley for a task

I really thought you were going to write a story about an evil person getting into your life and how they must be stomped

Attachment stored in iCloud:
Book for Jack.pdf (Attachment)

I made sure to point out how bad the weather is vs elsewhere like Florida. Just so Melissa is reminded

Laughed at "I made sure to point out how bad the weather is vs..."

how old is jack?

Some of these sentences are written in like graduate-level form

I asked for writing for 4-6 years old

But I see that

But

Good enough or ugh redo it

I mean I signed myself up and saw that as well

I didn't really read much of it

Lol

But the key is to use a higher token version of an LLM

I was reading saying holy shit this is complex

It doesn't stop before it should with a 200k Claude 3 . I used Claude 3 Sonnet 200k tokens version in Poe

Feed it a children's book for context

I should

Where did the early generative AI debate end on people selling books and self publishing children's books using AI

I recall that early on

Yes but they have to be trained to at that reading level

Chicken cutlet sandwich, provolone, bacon, roasted garlic mayo

The lapping of the water and a pooch

There just can't be anything better than that for a man

It really doesn't. Hence my subliminal knocks on Philly

I have a good group here now

Yeah? That's not something I've asked much about if at all.

Wasn't looking for it

Driven, focused, men who are fun and reasonable?

That's the bar that must be met so yes

Tech people in Gulfport is a thing

Shockingly

Some work in Gulfport some drive to Tampa or downtown st Pete working for tech

Edited

All hang at the kava bar

Edited

That's a great community they have and it's a tight group of all
Walks of life. The Willie's of the world walk by and I hear the judgements but it's
a very misunderstood easily judged group

I mean, you're a tech person in Gulfport so that makes sense. Likely for all of the
same reasons you enjoy it

Laughed at "That's a great community they have and it's a tigh..."

Yea just didn't think for first three months tech people were here at my age and
younger

The willy's of the world are a different type of Florida, but still in the location for
the same reasons

Yup

I dabble in both

The kava crowd doesn't drink

So I like that

A lot of em I don't think even really work

Mannnn I really enjoy a fun non drinking crowd. I can binge it and party when I need to, but I really don't like it otherwise.

It's nice to have a side group that doesn't

What did I pay you for that monitor?

425.00

4/14/24, 5:12 PM

Something like that yea

Above \$400.

Offer goes out tomorrow morning

70k

Not bad!

Nice flip for a \$425 monitor!

Haha my demand letter goes tomorrow too!

Emphasized "70k"

We're in sync

How's your case going?

Ceiling goes out at \$239k

Ooo I want that money for you

I predict \$40k will be their floor

Get this off your back

It won't be that number

Lawyer very specific

Sure I understand that

That's more than I want

If I could count emotional distress then fuck it I would want more than that number

Emotions aside . Reappraising based on now knowing gay Florida law

It has decreased

Can't sue for emotional damage?

Or the lost interest from a T bill?

Haha

I can not

Can't sue for my low T bill

Either

Laughed at "Can't sue for my low T bill "

I'm going shopping

Amazon. For a many small expensive things case

Laughed at "Amazon. For a many small expensive things case"

What you adding to your bag of wares?

I'll share

*Attachment stored in iCloud:

The dopest of the bunch is the Crucial

I'll be adding iPhone lens and such in Time. That's the next progression. I'll never return to DSL cameras with the ease modern days and ability to scale in storage and lens quality at a fraction

Shit load of wires and such no need to show but needs better storage

Look how tiny and cute the crucial is

2TB! And so so so fast compared to my other 2 TB external. I see and feel the importance of speed. Can edit seamlessly with media in the external that's always been annoying to move it locally for editing

Those boxes are two mic boxes and a receiver. All wireless. Can skip the receive with the iPhone app. Depends what you're doin

And my gimble not shown

You got your answer ugh that was a lot

A whole area of tech I haven't ever got into

I very much enjoy photography though. Maybe I'll get there

I'm more video

Touché

Or cheers

Sure yes both improve with lenses and storage

I love that the 15 has another gear but only if it's plugged into an external when you're shooting

4/14/24, 8:35 PM

I just assumed you always used attached usbc storage. Amazon prime has unlimited storage and can copy in real time

I think it even stores heic

boerner

If you saw what I just turned away from me

Actually I think this is tax pirate worthy

John and Marshall,

Please see Mr. Morris's first offer, attached.

As you are aware, this case is not governed by the family code. It is governed by the property code. As you are also aware, the rights of cotenants to recover for improvements made to the jointly owned property and the duty of the court to adjust equities in a partition suit is well established. It is well established that a cotenant who makes an outlay for necessary or proper preservation of the property is entitled to reimbursement from his co-tenants to the extent to which he paid their share of the indebtedness. The right of contribution arises from equitable considerations, and rests upon the principle that where all are equally liable for the payment of a common burden, all are bound equally to contribute to that purpose. See *Wooley v West*, 391 SW 2d 157; *Day v Day*, 421 SW 2d 703. Mr. Morris documented costs of improvements, repairs, and maintenance (along with other considerations he believes are relevant) in the spreadsheet and other material that he provided.

As shown by your client's spreadsheet and Mr. Morris's spreadsheet and documentation, Mr. Morris contributed significantly more to the upkeep, routine repairs, and improvements on the property. None of Mr. Morris's expenditures meet the elements for a gift. According to case law, the elements required to establish the existence of a gift are: 1. donor's intent to make a gift; 2. delivery of the property; and 3. acceptance of the property. Donative intent never existed on the part of Mr. Morris.

Since you were not willing to discuss our clients' spreadsheets, I have summarized the reasonable and necessary real estate expenses from Mr. Morris's documentation. Please see attached list.

Mr. Morris has a viable claim for return of the ring, as Ms. Alek Finkelman terminated the engagement. Please see attached case law. Mr. Morris believes he has other viable claims as well; however, he is willing to forego all of these if Ms. Alek-Finkelman accepts this offer.

As I mentioned multiple times during our telephone conference, there simply is not sufficient equity in this property to warrant a drawn out and expensive battle. Both parties are paying attorney's fees. Mediation costs and court costs would exacerbate the expense. Moreover, the real estate market is slow and uncertain. A comparable property has been on the market for 43 days and notwithstanding a price reduction to \$825,000 made some time ago, it still has not sold. (See attached email from realtor Brad Pauly). These parties need to move on with their lives.

Please let me know when you might be available to discuss Mr. Morris's offer.

Wait I gotta reread this was like wait what did I just read

That's what was sent tonight with my documentation

And my offer of 70k

Thats an excellent letter

She cited case law in it. Her lawyers wasted a full hour of her time and she wasn't happy

She also went to court to observe how the associate on Chelsea's side handled cases. Said he got remed and embarrassed by the judge for how ridiculous it was

Her lawyer sounds kinda behind the ol 8 ball

They told mine that they are treating the house as a gift

Which is hilarious

So she cited the case law there too

Hilarious

2500 bucks for my lady

Tru gen

Gem

I did all the legwork so I still have 4 hours left with her

Maybe more ish

Nice I'm at \$5k billed against retainer on \$7500 with demand letter sending

That's pretty decent actually

It is

You're far along in the documentation and building the case by then

So now it's back and forth

Chelsea was visibly confused this weekend as to why I was frazzled. I said, "I guess I'm the only one doing paperwork because I have the most skin in the game"

Not illegal what he's doing but when a ceo goes outside of legal council under an explicit directive to not communicate with a former employee, then does so, it could shift the emotion of a jury (should it get to that point). Also considering the 24 hour ultimatum he gave me in December to "sign this here separation agreement ...or ...don't sign it and lose the severance we owe you " - which is coercion

Edited

It's not going to a jury. Arbitration at worst

It's not "criminal"

That's a chat with your lawyer situation and then tell him the amount you want to settle

Not only criminal goes to jury. Employment law is settled with court / jury as well all the way up to the Supreme Court

Edited

But after arbitration / mediation

Optionally

To my knowledge

Litigating this just eating into profit

Great. Settle then. I see signs of seeking settlement . That's what I want

But no I'm not talking to him haha my lawyer has the email

Attachment stored in iCloud:

It really depends, in my opinion. If he's willing to offer or settle close to your amount without lawyers, that's ideal. Lawyers, as he said, are definitely going to slow it down and add to close.

Your goal is the money

If I win a trial, he pays my attorney fees

In Florida

I got plentyyy of time for this

Those are his pains. Obviously if I lose my law fees and opportunity cost on this whole matter are in the shitter

But read that second email draft I have shared this with lawyer yet and it's just a snowballing case

Yes in trial, but if it goes to trial that's what 30k?

On their tab if I win maybe more

Ideal to settle outside and get the money your owed

Yes

Win litigation. After mediation, after arbitration

Don't be confused I do not want to go to court

Mediation summary from your lawyer to a mediator is at least 10hrs of work

Yeah court is gay

Also depositions are public record

Good

Got nothing to hide but porn

I'm going to end up transacting my property. It's not worth burning the other end of the candle. Just looking at the numbers. I'll settle and get cash from her proceeds once sold

Good

It sucks but moving on is worth it

I mean, still bought and sold a property at almost 100% equity in 5 years

I'm quite proud of myself regardless

Only chink is that it's not fully on my terms

Loved "I mean, still bought and sold a property at almost..."

I've been using mind mapping techniques for the last 30-40 days.

Also been learning about non-linear thinkers and traits of said folk that of which I am, you may be too

I have sketch books with no lines. Very helpful

And I've tinkered with most the good digital mapping tools so I know the good ones if you want references to apps

[https://thegigabrain.com/search/Mind%20Mapping%20for%20Men%20with%20Adult%20ADHD%3A%20Daily%20Brain%20Exercises%20and%20Strategies%20for%20a%20Positive%20Transformation%20to%20Control%20Anxious%20Thoughts%2C%20Improve%20Concentration%2C%20...%20\(ADHD%20Workbooks%20for%20Adults%20Book%201\)?utm_source=ext](https://thegigabrain.com/search/Mind%20Mapping%20for%20Men%20with%20Adult%20ADHD%3A%20Daily%20Brain%20Exercises%20and%20Strategies%20for%20a%20Positive%20Transformation%20to%20Control%20Anxious%20Thoughts%2C%20Improve%20Concentration%2C%20...%20(ADHD%20Workbooks%20for%20Adults%20Book%201)?utm_source=ext)

Secondly, this tool I've mentioned before...It scans reddit for sentiment and reviews. It's called GigaBrain. It's a chrome extension on desktop. It's a safari extension on iPhone. Whatever you google Gigabrain cross references reddit. Adding to google search functionality, they just released reddit sentiment scanning when you search amazon which I find very useful as opposed to amazon reviews. Sentiment off real comments, not formal reviews

Highly recommend. "Inline" is a great feature. It brings chatgpt to any app like notes, notion, etc. I can now drop the notion AI functionality which is monthly cost.

This was \$19 one time fee on GumRoad - a marketplace I've really come to like. Loads of free stuff

You have a paid chatgpt, so you can spin up an api key for it and then you can toggle engines for inline feature. So chatgpt 4 over 3.5 and also the beta 4.5 is available through this method

Yeah stick to your khakis. Leave the beanies and streets for me

Lets me cook lolol

But that's not as funny

Yes she's an angel

Meds

Based on the list of medications provided, here are the detailed descriptions along with best-case and worst-case scenarios for each:

1. Trileptal 150 mg tablet (Oxcarbazepine)

****Usage:**** Typically used to treat epilepsy and certain types of seizures.

****Dosage:**** Take one tablet twice a day.

****Total per day:**** 300 mg.

****Best-case scenario:**** Effective control of seizures with minimal side effects. Patient experiences improved quality of life and can engage in daily activities with reduced risk of seizure episodes.

****Worst-case scenario:**** Potential side effects can include dizziness, drowsiness, double vision, and nausea. In rare cases, severe allergic reactions, hyponatremia (low sodium levels), and serious skin reactions like Stevens-Johnson syndrome may occur.

2. Olmesartan-Amlodipine-HCTZ 40-5-25 mg tablet

****Usage:**** Combination medication used to treat high blood pressure. Olmesartan is an angiotensin II receptor antagonist, Amlodipine is a calcium channel blocker, and HCTZ (hydrochlorothiazide) is a diuretic.

****Dosage:**** Typically taken once daily.

****Total per day:**** 40 mg Olmesartan, 5 mg Amlodipine, 25 mg HCTZ.

****Best-case scenario:**** Effective management of high blood pressure, reducing the risk of stroke, heart attack, and kidney problems. Patient experiences

improved cardiovascular health with minimal side effects.

****Worst-case scenario:**** Potential side effects can include dizziness, headache, swelling (edema), and fatigue. In rare cases, severe allergic reactions, electrolyte imbalances, and kidney problems may occur.

3. Guanfacine 1 mg tablet

****Usage:**** Commonly used to treat attention deficit hyperactivity disorder (ADHD) and sometimes high blood pressure.

****Dosage:**** Typically taken once daily.

****Total per day:**** 1 mg.

****Best-case scenario:**** Improvement in ADHD symptoms such as increased attention, decreased hyperactivity, and better impulse control. For hypertension, effective blood pressure control.

****Worst-case scenario:**** Potential side effects can include drowsiness, dry mouth, constipation, and dizziness. In rare cases, severe low blood pressure and heart-related issues may occur.

4. Sertraline 50 mg tablet

****Usage:**** An antidepressant used to treat depression, anxiety disorders, panic attacks, and other mood disorders.

****Dosage:**** Typically taken once daily.

****Total per day:**** 50 mg.

****Best-case scenario:**** Improvement in mood, reduction in anxiety and panic attacks, and better overall mental health with minimal side effects.

****Worst-case scenario:**** Potential side effects can include nausea, insomnia, diarrhea, and sexual dysfunction. In rare cases, severe allergic reactions, serotonin syndrome (a potentially life-threatening condition), and increased suicidal thoughts, especially in young adults, may occur.

5. Hydroxyzine 25 mg capsule

****Usage:**** An antihistamine used to treat anxiety, nausea, and allergies, as well as for sedation before surgery.

****Dosage:**** Typically taken as needed.

****Total per day:**** Varies based on use.

****Best-case scenario:**** Effective management of anxiety, nausea, and allergy symptoms with minimal side effects. Can also provide sedation when needed.

****Worst-case scenario:**** Potential side effects can include drowsiness, dry mouth, and dizziness. In rare cases, severe allergic reactions and prolonged drowsiness may occur, affecting daily activities and overall safety, especially when operating machinery or driving.

For precise dosing instructions and to understand the full range of potential side effects, it's crucial to consult with a healthcare provider or pharmacist.

The native chatgpt app is better than the web experience

But doesn't have superpower gpt

4o in general is mildly better. Certainly a clip forward but only impactful in some use cases more than others. Image generation is one that improved greatly. The native app was live when you sent it but I didn't have access yet it said . I just had to spin up a new account recently so I wonder if account tenor is why.

Having the 4o API is awesome tho

This is what I signed up for already

Cloudflare - what I've done is register the domain name somewhere and then transfer into Cloudflare

Can you change name servers then?

do I have to host on cloud flare?

I can on webflow but hosting comes with it. Good to start but easy to migrate to better hosting later as needed

Yes you can change it all

Part of the transfer process is changing all of the dns and transferring it all over to Cloudflare

Power automate is a feature they launched so early years ago and leapfrogged the companies doing the early stages of real enterprise automation. Just slid it into office and basic functionality automation companies went poof. Microsoft was/is considered UiPath 's main concern competition wise. Rightfully so. I check UiPath product suite time to time and the sense I get is they are behind and stuck in their product suite/native to the wrong generation

Wait trial?!

Hold hold hold on

Did you get it from the App Store?

Or GitHub?

Attachment stored in iCloud:
PNG image.jpeg (Image)

wait! paid version is available through my SetApp subscription

i got from GitHub

installed through terminal

Oh oh that's why

Use here

https://github.com/jacklandrin/OnlySwitch/releases/tag/release_2.5.1

OnlySwitch.dmg

That's the installer

Uninstall the version you have

just uninstalled. i'm trying the setapp route first

setapp is great

Attachment stored in iCloud:
IMG_5120.jpeg (Image)

If I left click, I get this

If I right click the icon it expands the hidden icons

Attachment stored in iCloud:
IMG_4967.jpeg (Image)

nice. basically hidden bar in a nutshell

okay i'm good

thank you

setapp was fine

And the keep awake function replaces amphetamine

yep saw that

So one less thing in the menubar, but also one less thing running resources

agree

Trying to think of what else I have installed

I have made use of Sonoma's new widget on desktop

*Attachment stored in iCloud:
IMG_6506.jpeg (Image)*

yea i was messing with it but didn't finalize

Really the only thing I needed

that widget existed before

Or wanted*

Yes but not on desktop

it did

It was a sidebar thing

Oh damn

i've had

Had no idea

i love hiding desktop items

i use documents for the sole reason i hate desktop icons

but want the functionality occasional

I really only have my screenshots go to desktop. This way I can remember to delete them

interesting you can not right click on your desktop when you are hiding your icons through one switch

launcher is an app to create custom widgets

Yeah I mean it's just a folder so not many operations on the desktop if there's nothing to "folder"

kinda annoying setup not so straight forward but people love it

I'm also conscious of widgets on desktop since those also hog resources

<https://apps.apple.com/us/app/launcher-with-multiple-widgets/id905099592>

One thing I ALWAYS do on my Mac is turn off allowing wallpaper to tint windows

*Attachment stored in iCloud:
IMG_3997.jpeg (Image)*

I also limit what Siri and search index across the Mac for performance too

i do the same

Phone and Mac all get limited down

i have stuff i don't want popping up as well

keep that right

Laughed at "keep that right "

PERFORMANCE

I'm looking forward to this upcoming trip

ah yes i too

5/23/24, 5:49 PM

*Attachment stored in iCloud:
IMG_6269.jpeg (Image)*

yea

This is a very fast, very competitive response to the recent live streams

been usin

That can't help google

Just not allow people to integrate with chatgpt? That seems desperate

interesting. it's all moving so incredibly fast man

love it

Makes me want to move my google shares into more Microsoft shares

I like it

Are you enjoying the developer side of this?

it's like art. the vision stops short if you don't have the right tools to create what you want

more tools

more vision

well

not more in volume but a new category

I'm so glad you said that, I was thinking that. The boerners come from a line of creative builders. In this case, this is your canvas

yes

Creative creators

plus chatgpt just makes it more fun to learn tedious things

Yes absolutely

not just copy pasting actually learning

Once you get into APIs, you can just build and send data over to an api, get the results, and then display it how you want

my next little project is to getting APIs into notion. i've learned a lot of notion last 60 days. bought courses and templates to see how they did this or that then just redoing them better. i want specific bots with specific knowledge bases in specific notion pages within a notion template that comes with my courses

Miami is a hike

even the tampa location i mean

45 min drive too

tampa casino is 45

but steve at 8am is far more conservative than steve at 1am so consider that and let's play it by ear

Lucy had a growing bump or a lump under her skin under her belly and we just got the test back and it's benign

this put me in the party mood

as the opposite result, would've been devastating depression

Labs are prone to those fatty deposits right?

Glad she's good

dunno.

originally thought she was black lab with some border collie but now know she's a border collie with some black lab.

Kora has had two of these and I had them removed. If you feel one and its loose under the skin and not seemingly "attached", I'd be less worried

My comparison is the tumors I had and how they felt

They were firm, attached below my skin and didn't move

why would you pay for this app. i never understood its value outside of free

you don't need this, it never existed before this time and people have flown just fine

The pro version syncs to your email and calendar, adding everything automatically

subconsciously you came here for me to tell you to not do it

Muting my phone and its in my bag. Ill check it at 1:30pm. Meet at grass roots at 2pm no later. I have a 3pm call john set up for a nice prospect so we have a meeting brief at 2:30pm at my house he will drive us back. Unless you want to stay in town, do you. Ill be home 2:30pm onward. Could do an evening session somewhere else like st pete beach too

Ok let me see how I can shape my day

Called melissa on her way to work. Told her what needed to be said/what she needed to hear. I understand it. We are gonna have that talk. Shes in. Its time. Good talk with john too. Hes a good influence for me. I asked for his help and i have it. Have a good day. And thank you

How you doin boner?

Good. Crushed the call. Update later. Short term real money opp. Tis good. Steps to convert in motion. Close or not close 1-2 weeks. Relieve stress with cash.

Taking lucy out we just finished. Then low tide on cart. If you uber, and want to meet go to low tide. Or if you need or want to stop at house i will come get you when you are ready to come downtown. I wanna be out if house as much as possible

You wanting to be out of the house as much as possible isn't something I took as a positive

At grassroots getting some kratom

And nice cool air conditioning

Maybe the critiques are best left for in person. How you look at something related to me is important to me, i value it, but im not going to pander to perceptions and expectations. That sounds like im upset at that comment. Im not. I know where it comes from. But just over 12 hours after a brutally honest convo deserves honesty back. The joys of gulfport are outside. Providing a dog with what she needs is outside. People who say hi and friends you bump into are outside. Thats all i meant by outside. Doesnt mean being alone equals depression or whatever isnt positive. Only clearing it so people who love me dont read into things. It was typed from balanced perspective of doing the things that are going to play a role in pulling me out, which mostly...are outdoors...like golf

high utility for projects with lots of screengrabs

i love the whites of a dogs eyes

Whatever it is

admirable quality

Has some tweaks but not much

Loved "admirable quality"

try that tool. very good. got it through setapp

I note those things now before sharing with you

what do you mean

Ok so I was skeptical of tools like this and the paste apps

I'm very open

yea good

Over editing vs taking the right shot

Since you have the eye for over editing too

I've also been building

https://excalidraw.com/#json=XxjaUuHJ_6pM8DgC7pRN7,MH9WaBZfn_4N0pLHhtxv0g

i do, but its often for sport and skill development and knowledge. if its published work, i would not want overeating

Every shot is 100% effort

Editing only for executing my idea

Fixing shape or rotation from my own mistake

i like a blend and will add more of that style for the sake of productivity

I'm reading your work

in a bit

ive gotten multiple excalidraw links shared recently . people seem to like it

I was waiting to talk about this tool, possibly for recommendations to others

What it does that I really like

It will only select items that you fully cover with your selection area

So you can move items without confusingly move all items

moving* all items

An odd quality of life feature

It's also simple. It sticks to its purpose

No tables, etc

Well, this is an obvious lesson. JLab is a brand that was predictably awful. They just couldn't hold a Bluetooth connection to save their life.. "hello, your connected ". You're disconnected goodbye "hello you're connected ""goodbye "

I also realized I don't want dual Bluetooth as for my workflow it doesn't work or isn't required. I would much rather have the chip inside the beats for a single channel extra strength.

In my kit, I don't fuck around with headphones. Cornerstone item of success while working

Thats a simple question to a complex situation

I dont wanna if this that today

Just sharing broadly

Been a good couple days with her

Can you park a Mercedes sprinter at the clam bayou?

But

Yup

Having a clam bayou address sounds sort of fun

Vans all over town here

Can park anywhere in florida basically

That's like a whole new community that you would break into

If it ever gets to a place where you can understand it, you are probably closer to even writing a course on it

Why dont we do a more feasible project in the not too distant future where i build course and funnel around your knowledge base and we find a happy split

Wait until you see what i invented

A process. A trade secret if you will

To rapidly scale courses

I did it good

And it worked

I don't need to split

Eh i dont do that

But building a course and using my knowledge to learn is awesome

You'd need to work on it

I mean, I'm learning too and I'm not interested in courses

You wouldn't be on cam

And if by learning, and just so happen to be working with you on tech stuff, I'm very satiated there

Nevermind too much other options and I can do it too and just bat it around with u

I like batting it around

Appreciate the expertise

I'm going to focus now

I'm curious about it all so I MUST learn it

At nearly 40, I can't fall by the wayside knowledge wise

With what I do, where I live, and where I found the most success with cash

A dog + Mercedes sprinter van + beach + coffee + internet is about as dream life as possible

It's the final boss of "rapid deployment beach kit"

I recognize why this might not be a good thing at first, but I wonder if Willy would do a 3 person BIG house. He'll be very very different, but also balance the house out a bit

And \$\$\$

Superior bluetooth maneuverability. Fast transition zero issue thus far. ANC excellent. I'm sure, I know, it gets better at next tier up but this fits the bill. ANC over dual channel bluetooth, if I'm picking one feature over another, is ANC all the way. Talking on phone stellar. Apple integrations and controls are great. As of now this makes up for the Beats pods I had a year ago where one stopped working and they wouldn't help me. 2 years Apple care this time.

Good feature rec on the ANC under estimated how much I'd like to shut people up

I'm not always about the next tier! Our electronics journey is completely individual and endless. The Apple umbrella is compelling even if there are "less" features

Let's review the QB test results provided:

Overview

The QB Test provides an objective measure of activity, attention, and impulsivity, and compares the patient's performance to that of a control group of the same age and gender.

Activity

- **QbActivity Score:** 4.1 (99th percentile)
- The patient showed significantly higher activity levels compared to the control group. High activity scores suggest hyperactivity.
- **Time Active:** 88% (Q1), 89% (Q2), 88% (Q3), 86% (Q4)
- **Distance:** 32.8 (Q1), 37.3 (Q2), 30.8 (Q3), 29.5 (Q4)
- **Microevents:** 8.9 (Q1), 9.0 (Q2), 5.2 (Q3), 4.7 (Q4)
- **Motion Simplification:** 31.5%
- These measures show consistent high activity throughout the test duration.

Attention

- **QbInattention Score:** 2.8 (99th percentile)
- The patient demonstrated significant issues with maintaining attention.
- **Omission Errors:** 23.4 (Q1), 11.6 (Q2), 23.3 (Q3), 34.4 (Q4)
- **Reaction Time Variability:** 233 ms
- **Reaction Time:** 684 ms (Q1), 759 ms (Q2), 869 ms (Q3), 799 ms (Q4)
- **Normalized Variability:** 2.1 (Q1), 1.5 (Q2), 1.9 (Q3), 2.3 (Q4)
- High omission errors and reaction time variability indicate attentional deficits.

Impulsivity

- **QbImpulsivity Score:** 1.2 (89th percentile)
- The patient showed moderate impulsivity compared to the control group.
- **Commission Errors:** 2.2 (Q1), 2.4 (Q2), 3.2 (Q3), 3.0 (Q4)
- **DprimeMod:** 7.2 (Q1), 6.9 (Q2), 7.0 (Q3), 7.2 (Q4)
- Commission errors represent the number of incorrect responses, indicating impulsivity.

Interpretation

1. **Hyperactivity:** The high QbActivity score indicates significant hyperactivity, consistent with ADHD hyperactive/impulsive presentation.
2. **Inattention:** The QbInattention score shows the patient has marked difficulty in maintaining attention, common in ADHD inattentive presentation.
3. **Impulsivity:** The QbImpulsivity score, while elevated, is less pronounced compared to activity and attention issues, suggesting that impulsivity, although present, is not as severe as other symptoms.

Clinical Recommendations

- **Diagnosis:** The results strongly suggest ADHD, with both hyperactive/impulsive and inattentive symptoms.
- **Treatment Plan:** Consider a comprehensive treatment plan including behavioral therapy, environmental modifications, and possibly pharmacotherapy.
- **Further Assessment:** Conduct a full clinical evaluation to confirm the diagnosis and rule out other potential conditions.

These results should be interpreted in the context of a comprehensive clinical evaluation by a qualified healthcare provider.

Official add/hd? Is that something more pronounced now than ever?

Well damn those joints look like the old kora

Great share

She's doing so well now. I've gotten her weight where it needs to be and I'm building her rear muscle back

Amazing

Also, underrated musician well maybe not i dont know the perception of Mac Miller but listening to his albums straight through and its very well written and produced. There is actual talent i didnt expect. I thought it was more white trash rap just looking at the guy . Kinda low fi ish story talking doesnt try too hard. Unique sound

Mac had some great talent in different areas. He did an amazing freestyle on the LA leakers

I'll find it

He dead?

Or that another

He killed himself

Likely related to the breakup with Ariana grande

Damn thats right . I can hear it

So LastPass was down and ill migrate to something when time is right. Considering the discussion around all things apple, why fight iCloud Keychain and Passkeys. Apple devices always trying to steer users away from third party password apps. I know OnePassword is largely preferred over LastPass but where do you stand on Apple native solutions

I haven't been great about passwords as of late. 1password is great, but I hate subscriptions.

I've been using Bitwarden instead

I still have wares

Cracks me up still

Well screw you then

Laughed at "Well screw you then"

Simplify, focus, execute, repeat

Then focus aggressively on simplify

Go write a book already

Expand it over and over

Complexities of simplification.

Unsubscribe

Turns out simple is actually really fucking hard

It is

And take a lot of thought

One legend of this space speaks to four apps on his phone

Four

But what have i ever gotten done on my phone i couldnt have done on a laptop ?
and did the time wasted on my phone exceed the value produced on my
iphone ?

I would argue that enjoyed time is not wasted time

Now finding where enjoyment and work meet, that's the golden ticket

I would argue that's incredibly broad and far too obvious and equally distant from the fine nuances uniqueness of every situation's variables

in other words...duh

I think a lot of people define video games, tv, movies, sleeping, resting, as wasting time

And I disagree

again...that speaks to you having an opinion on the fine nuances and the weight of your unique variables and situational relationship with the subject matter

so you're right

not wrong

and they are broad in that opinion

Yes you're right there

just like you saying enjoyed time is not wasted time

Very fair

they are the same comment

my arguing skills are improved i'm sorry

not sorry

but sorry

lol

Yet that sentence

says a lot

my instinct is currently to ingest while developing a counter

id prefer not

Let's take some bjj classes next time I'm in town

umm

like as the males they practice on?

And also just sit in peace on the beach

st. pete has those classes

oh

i do yoga now on the beach in gulfport. well. i just started

Bjj classes yes, beginner

10am they hold it 4 days a week

what is bjj?

I love that idea

Brazilian jujitsu

oh

Chokes, self defense

Ground and pound defense

Tell me about yoga

for me, i like yoga and i like pickle ball. i have two rackets and balls and still am yet to play and shaded lovely courts are two blocks from downtown

i like the idea of it rather

6/14/24, 12:00 AM

considering i have liked similar sports previously

You were a bit preoccupied while I was there. Let's go play

i'm less now

Beach + pickle ball + yoga

Is a glorious day

agree

beach and yoga same time too.

if timed well, its even better

10am yoga is a really good time

Not too early

Like it's not a "hassle"

it is. and its 75 minutes donation based and good group that goes
a homeless man joined and was committed and was very welcomed

How many times have you done it?

i like the homeless population here

3

I enjoy that moment about 20-30 minutes in

in gulfport on beach 3. but done yoga itself so many times

When I've shed that exterior guard around my brain

5 days a week in winter college golf junior and senior year

I lose myself

In my breath, in my pose

i like that this yoga outside is grounding

which is unique for me

grounding from an electrical perspective with the earth

There has to be something about those minutes early and outside too. Barefoot

also metaphorically grounding i suppose

Starting your day within yourself and on earth

Grounded as you said

there is. based on my research after hearing about it and how mothers are starting to calm babies crying by stepping into the grass

and people running currents from their bed to a rod in the ground even in cities

inflation goes down

There's something about the way grass feels on your feet too

hypertension decreases

all anecdotal tho

Cold, refreshing, stimulus

placebo and actual science outside the body at play

I'll take placebo if it makes me believe it

and in the body

The way cold grass in my feet feels

not placebo i take that back

I won't argue it I guess

I'll accept the questions and pseudoscience

either way, placebo is better than medications you think are failing you

I'm glad you're doing yoga

often even better than medications or therapies you think ARE working

its so strong

a man had the wrong surgery but believed the surgery was focused on what he went in for, but the placebo effect in recovery led to the initial issue self healing

it was not

they erred and did the wrong surgery

Was it... pacemaker surgery?

no, in that situation, i woke up in the middle and needed actual drugs

something aint got time for placebo pleasantries

this has been a placebo plesantry but i must digress and retire for the day

Laughed at "this has been a placebo plesantry but i must digre..."

Later boner

I'll find some yoga to do

good day

Donation based

Not some capitalist pigfest

Smart little fucker right there

The bird?

Got himself a big ol' Texas sized cricket and taking a bath

Calmness in nature

I watched a three legged dog savoring life this morning

Some say I'm a 3 legged dog

6/16/24, 2:35 PM

john used the same joke. was good

i'm gonna make that iPad board

just ordered supplies. and i'm modifying the pencil

all for a side project

Using the art board?

i got a roll of white board adhesive instead of the canvas board

Maybe some small magnets epoxied in the edge

i'm erring away from magnets

several reasons

would be concerned to have a magnetic surface with the MagSafe magnets being specifically positioned for mac safe shaped magnets. could tug on components outside of that MagSafe shape

also, with a pacemaker, i don't like the magnets.

So using melamine now?

Not like the material i bought for the outdoor whiteboard this is a roll of peel and stick to put on a surface like sturdy cardboard for this first version. Best to get the cheapest workable materials and live with it and then tweak it

I got adhesive clips and little elastic cubbies for it

Are you grabbing that art board? It comes with a few pieces for truck and error

I want it with a stand and also a large paper notebook behind the whiteboard cover

No i looked at it but didnt like the surface

Ah yes many more features

I may try it later

Prob will

Well surface is for paint capture but that adhesive would do well on it

Wrapped + epoxied edges so they don't wear from rubbing

I didnt pick you for kickball at recess. Its not personal. Let me watch you play for the other team. Maybe next week ill pick you

Oof in-sec-ur-ity

You see it i see it we all seeee it

All stemming from a project board link

Enjoy that hole

The project hole

Project holes, balanced correctly, is balance for life. When I'm at my best, I have side projects, side interests, both of which I've had none of lately. This was prescribed! Wait, me insecure or you im confused

It did take 2 hours tho

So now im insecure of what i need to do today

You definitely

YOU DEFINITELY

ME a little

Hollow earth

Both are used

Ah got it

Met Brynn's dad this weekend and we got to talking about conspiracies and hollow earth

Smoked a joint walking through Austin and talked conspiracies

My kinda man

That's what I said too

He's interesting and very smart

Breath of fresh air

Knowing the lineage is as measured and thoughtful and interesting. Especially if I compare even though I know comparison is not healthy

That old quote "comparison is the thief of joy"

I like that one

Have you setup anything good here?

Its heavy on your system. People hate it. The off toggle is the top feature request by far. I made my mouse top middle small black button a prompt but thats it

it IS heavy on the system!

I disabled the service because of that

That one day I was sending you the computer tuning tools and that was part of the reason

I deleted the service in the package actually. Then every single update it re adds itself

None of this worked out.

Shes leaving

6/18/24, 9:04 AM

Did perplexity stop working for you?

App hasnt worked in like a month

I'm getting ready for work. Call you in a bit?

On the drive in?

Nah not today

Thanks tho

I don't use perplexity

Im good

If ever

Thought you did nevermind

Wasn't a "talk" but more so that annoying misunderstanding thing didn't happen over text

Plus I'm getting ready for work

Do u. Have a good day. No misunderstanding here

If you stay, I'm expecting a Lucy x Florida tattoo

I use phind a lot

Ok last one today. In Only Switch, the one from GitHub, I use this Low Battery Mode often when working remote

Ok actually last one: I really think you could make a successful instagram content account about your setup and tools for working remote. Your setup, things you created, what to look for in new places.

Maybe a more fun version of that, and capitalizing on the assumed change that's coming to GulfPort, you could make it specific to GulfPort. "Remote In Gulfport"

Pair this with John's video expertise, your funny persona, I think this would crush
